

GUARD WASH
EXPRESS

Application procedure

1. Shake the product well before use.
2. Always test on a small hidden portion of the substrate before applying.
3. Do not apply the product when it is raining or there is expected rain.
4. If the surface is heavily covered with micro-organisms, brush before applying the product.
5. Apply the product to the surface using a low-pressure sprayer.
6. Use a bristle brush to gently move the product around so that it covers the area that is being cleaned.
7. On vertical surfaces, always apply from bottom to top.
8. Rinsing is not required, but removes the last residue. If rinsing, wait 30-45 minutes and use a jet of water or a high-pressure washer.
9. Before repainting or applying a protective product, the material must be completely rinsed off and dry.
10. Repeat the process if necessary.
11. Indicative coverage is 5m²/Litre.
