

GUARD CLEANER[®] ECO

SURFACE PREPARATION

Please Note

- Shake the product well before use.
- Always test on a small hidden portion of the substrate before applying.
- To increase the efficiency, first wet the surface with water.

Application procedure

1. Apply the product liberally to the surface using a low-pressure sprayer, trigger sprayer, brush or roller.
2. Use a bristle brush to gently move the product around so that it covers the area that needs to be cleaned.
3. Wait 3 minutes.
4. After 3 minutes, rinse off the treated area with water while at the same time, using a hard bristled broom, brush the treated area.
5. Rinse off the area completely with water.
6. The entire process should not take longer than 6 minutes.
7. Never leave the product to dry before rinsing.
8. Repeat the process if necessary.
9. If using a sealant, wait for the area to dry completely before sealing.
10. Indicative coverage is 5m²/Litre.
